PROFESSIONAL SUMMARY

Machine Learning Engineer & Data Scientist specializing in NLP, Generative AI, and Predictive Analytics. Proficient in Python, SQL, and cloud platforms, with expertise in LLMs, MLOps, and Deep Learning (TensorFlow, Keras). Experienced in developing and deploying scalable AI solutions for real-time applications. Passionate about AI innovation and applying cutting-edge ML techniques.

RELEVANT COURSEWORK

Machine Learning | Deep learning | NLP | Database Management | Artificial Intelligence | EDA | Statistical Analysis | Data Analysis

TECHNICAL SKILLS

Programming & Data Tools: Python, SQL, Bash, Pandas, NumPy, FastAPI, Flask

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Hugging Face, OpenCV

Cloud & MLOps: MLflow, Airflow

EXPERIENCE

Machine Learning Engineer - Omdena

Sep 2024 – Present | Remote

Kitwe News Aggregator

- Developed and deployed an AI-powered news classifier using BERT, achieving 98% accuracy in multi-topic article categorization.
- Streamlined data pipelines and data preprocessing, reducing training time by 40% and enabling real-time analysis of 50K+ daily news articles.
- Implemented scalable MLOps workflows with automated retraining, reducing model deployment failures by 35%.
- Enhanced text clustering and entity recognition, increasing classification recall by 20% and improving news segmentation.

Medical Prescription NLP

- Developed an NLP-based medical prescription processing solution to extract and structure relevant information from prescription documents.
- Applied Natural Language Processing (NLP), text preprocessing, Named Entity Recognition (NER), and information extraction to identify medical entities.
- Designed data preprocessing workflows to handle unstructured prescription text and improve the quality and consistency of extracted information.
- Leveraged Machine Learning and NLP techniques for automated medical text analysis and prescription information extraction.

LEADERSHIP & CONTRIBUTIONS

- Led and managed multiple AI projects, overseeing NLP, data pipelines, and real-time AI systems for scalable solutions.
- Mentored contributors, optimized cloud-based workflows, and ensured efficient model deployment.

EDUCATION

Bachelor of Science in Agriculture - Annamalai University

May 2018 – May 2022 | Chidambaram, Tamil Nadu
